## PROFILE

I am passionate about mobile development as I am passionate about helping people. I am always looking for become more effective in my job and improve the quality of my delivery. All related to leadership skills is something that I really love as well.

## WORK EXPERIENCE

### **Senior Software Developer Consultant at Thoughtworks, Recife**

**July 2020 - Present**

I am currently working in real estate agency app as Android specialist, but sometimes I need to pair with others developers on REST API backend and Messaging backend, BFF (backend for frontend) and iOS app. The App has MVVM + clean architecture, Junit for unit tests, Espresso for UI tests, UIAutomator for integration tests, Jenkins for CI/CD, Firebase for remote config and analytics and also has Firebase Test lab, Jira to manager tasks and Kanban methodology.

### **Software Developer Consultant at Thoughtworks, Recife**

**January 2019 - July 2020**

I worked in android library project, which was a Player for streaming app. I could learn about DASH, HLS protocol, worked with ExoPlayer, built CI and CD from zero, automated a lot of UI testings in order to eliminate a extensive sheet of manual tests, worked with plugin architecture, helped others developers to grow up in their career and also became more effective in their position, I developed leadership skills and could made important decisions for the project as well.

### **Graduate Software Developer Consultant at Thoughtworks, Recife**

**April 2018 - January 2019**

I participated in ThoughtWorks University program, which was an immersive entry-level program spent five weeks in China with a global network of peers learning how to build working software from day one. More details here: <https://www.thoughtworks.com/careers/graduates>. I could practice TDD, design patterns, SOLID, global relationship building, CI, CD, feedback culture, 1:1, testing skills, pairing with QA engineers and Business Analyst, understanding client requirements, developing consultant skills such as influence, presentation, facilitation and teaching. I also worked at distributed team project (e-commerce) with US client,

which had a huge tech stack like Java, Spring MVC, Mongo DB, web development, Python and infrastructure support.

**Software Engineer at Accenture, Recife**

**April 2017 - April 2018**

Key-words: Android project using Java; Ionic 3 project; React Native; Scrum.

**Software Engineer intern at i2 Mobile Solutions, Recife**

**October 2015 - March 2017**

Key-words: Android shopping apps; Android news apps; Android social car app.

---

**EDUCATION**

**Catholic University of Pernambuco, Brazil — B.Sc. in Computer Science, 2017**
